

We Are Neurotech

About

The We Are Neurotech project is a collection of video responses from neurotechnologists of all backgrounds to some basic questions designed to show the diversity of thought in the field. This project sheds light on the many possibilities of this new class of revolutionary technologies. Responses are collected from researchers, entrepreneurs, executives, students, and enthusiasts that represent a wide variety of perspectives. This project is maintained by The BCI Guys LLC.

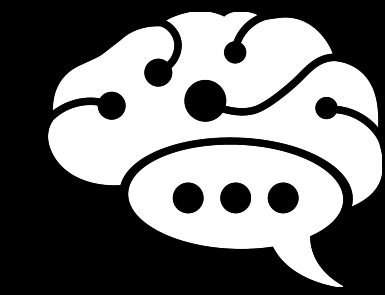

Neurotechnology is...

technology that records, stimulates, or works with the brain and nervous system to influence how researchers understand the brain and consciousness, supplement, engage, or monitor the nervous system, or allow a user to influence the functioning of a machine from brain function.

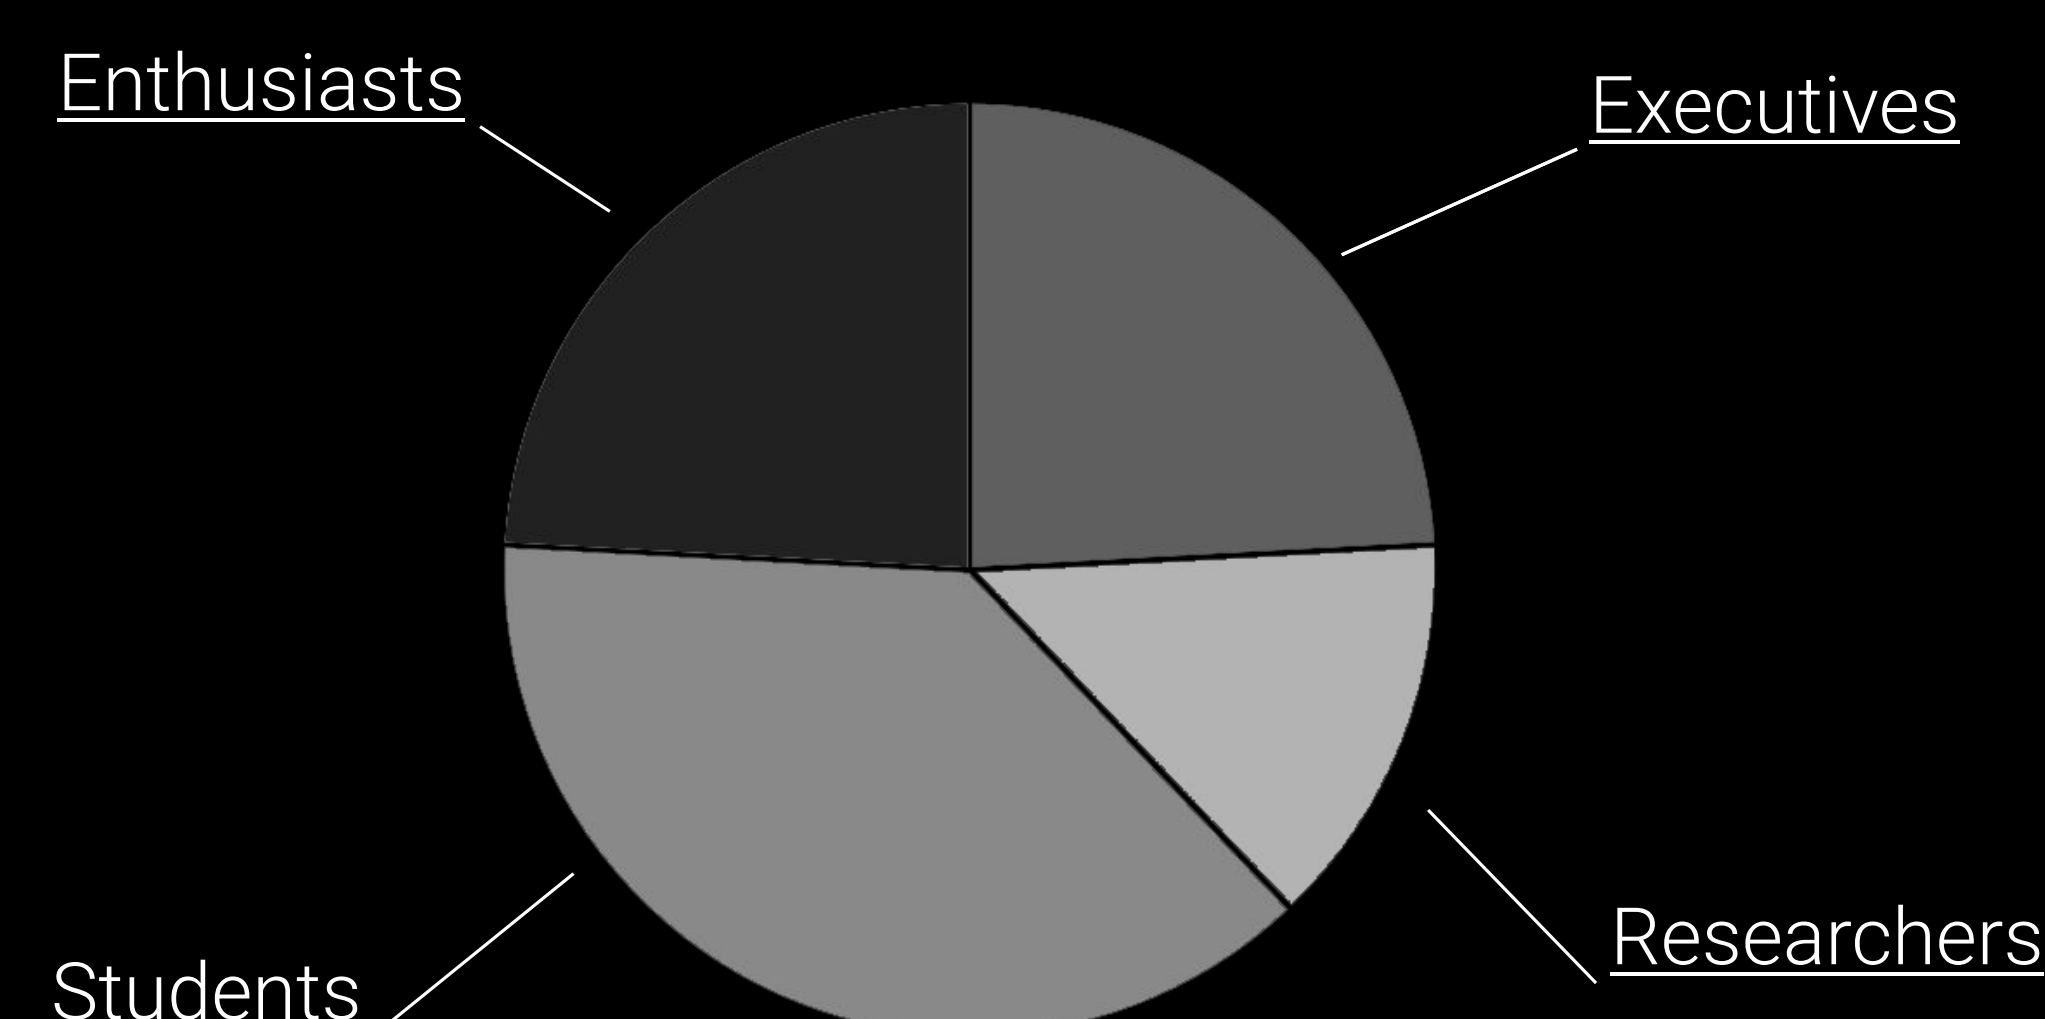

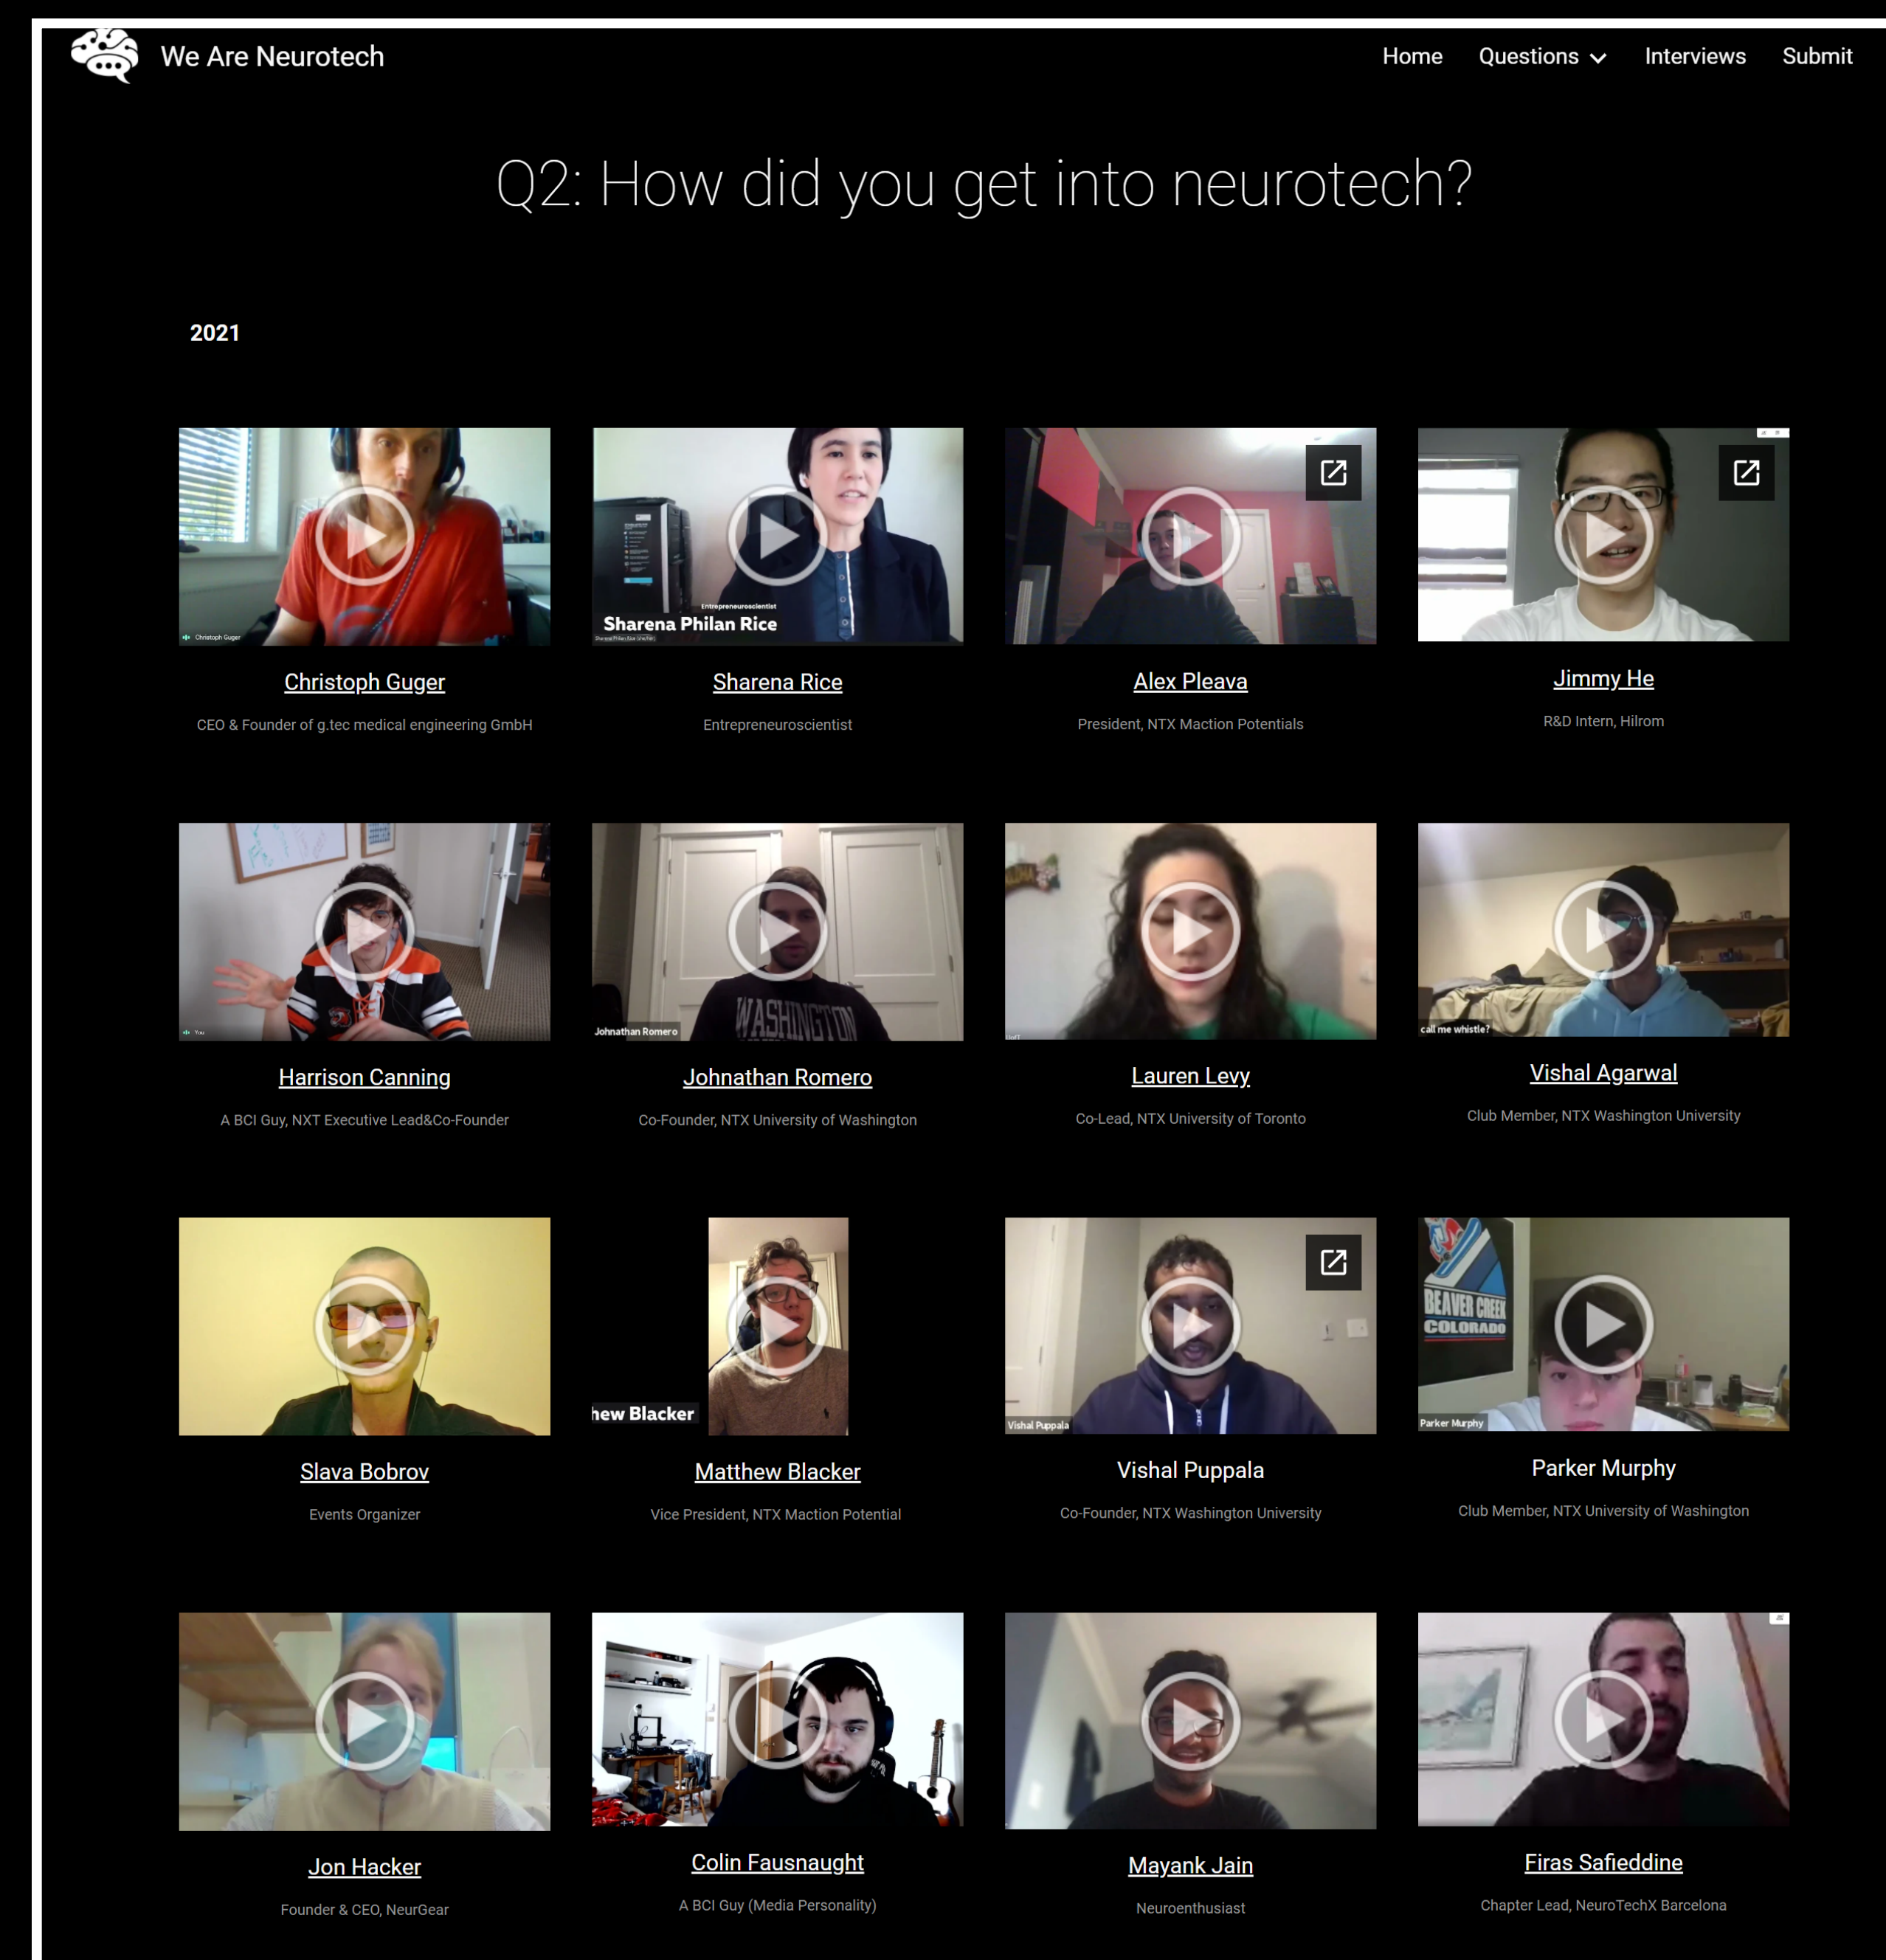

Concept:

To highlight the multidisciplinary nature and diversity of thought in the field of neurotechnology through a collection of video responses from neurotech executives, researchers, students & enthusiasts!
